E. Eng. Lib.

METALS and ALLOYS

Volume XII—July, 1940 to December, 1940

SUBJECT INDEX

Air-Conditioned Automobile, Metals and Alloys in.—Herbert Chase. 141 Aug.

Aircraft, Magnesium in.—Norman E. Woldman. 430 Oct.

——— **Stampings,** Producing, in the Douglas Plant.—Herbert Chase. 436 Oct.

The Airplane Laboratory and National Defense.—Robert C. Woods. 451 Oct.

——— **Tubing,** Titanium and Some Properties of Cr-Mo Steel for.—George F. Comstock. 21 July

Alloy Steel Industry, The American.—Edwin F. Cone. 27 July

Aluminum.—Colin G. Fink. 761 Dec.

The American Electric and Alloy Steel Industry.—Edwin F. Cone. 27 July

American Iron and Steel Institute, The Technical Committees of.—Charles M. Parker. 764 Dec.

Antimony.—G. A. Roush. 420 Oct.

Bearing Metals from the Point of View of Strategic Materials.—H. W. Gillett, H. W. Russell & R. W. Dayton. 274, 455, 629, 749 Sept., Oct., Nov., Dec.

Beryllium and National Defense.—C. B. Sawyer. 426 Oct.

Cast Irons, Electric Furnace, Containing Copper.—T. E. Barlow. 36, 158 July, Aug.

Cast Steel Crankshafts, Ford, Now Poured Continuously.—Edwin F. Cone. 267 Sept.

Cast Steels, 9 Per Cent Cr—1.5 Per Cent Mo, Properties and Heat Treatment of.—Fred B. Riggan. 615 Nov.

Chromium.—Samuel H. Dolbear. 416 Oct.

Copper, Powder Metallurgy of.—Claus G. Goetzel. 30, 154 July, Aug.

Copper Circles, Rolling World's Largest. 149 Aug.

Correlated Abstract
Hydrogen, Flakes and Shatter Cracks—C. A. Zapffe & C. E. Sims. 44, 145 July, Aug.

Dairy Industry, Metals and Alloys in the.—H. A. Trebler. 735 Dec.

Editorials
An Announcement—July
Brighten the Corner—July
Manganese—July
Western Metal Industry?—July
A First Line of Defense—July
Tailor-made—Aug.
The "Significant Steels"—Aug.
Electric Steel.—Aug.
Trends—Sept.
The Metal Industries and Defense—Oct.
Our Cover—Oct.
Strategic Metals—Oct.
We Receive an Honor—Oct.
The Low-Alloy etc. Steels—Nov.
Designing for Powder Metallurgy—Nov.
18:8 and Notched Fatigue—Dec.

Electric Furnace Cast Irons Containing Copper.—T. E. Barlow. 36, 158 July, Aug.

Electric Furnaces and National Defense.—W. M. Farnsworth & M. J. R. Morris. 446 Oct.

Electric Steel Industry, The American.—Edwin F. Cone. 27 July

Electrical Detection of Flaws in Metal.—Horace C. Knerr. 464 Oct.

Flakes and Cooling Cracks in Forgings—a Problem in Ordnance.—Francis B. Foley. 442 Oct.

Flakes, Hydrogen and Shatter Cracks (Cor. Abs.)—C. A. Zapffe & C. E. Sims. 44, 145 July, Aug.

Flame Hardening, Some Metallurgical Phases of.—R. O. Day. 166 Aug.

Flaws in Metal, Electrical Detection of.—Horace C. Knerr. 464 Oct.

Ford Cast Steel Crankshafts Now Poured Continuously.—Edwin F. Cone. 267 Sept.

Forgings, Flakes and Cooling Cracks in—a Problem in Ordnance.—Francis B. Foley. 442 Oct.

Hydrogen, Flakes and Shatter Cracks (Cor. Abs.)—C. A. Zapffe & C. E. Sims. 44, 145 July, Aug.

The Iron Powder Situation.—Albert T. Fellows. 288 Sept.

Lead Foil for Radiographic Screens, Mounting.—Royal G. Tobey & Herman E. Seemann. 40 July

Letters to the Editor
Pinhole Corrosion in Galvanized Watering Tanks. 52 July
More About "Wanted—Words." 53 July
Electron Diffraction Study on Hot Galvanized Sheets. 54 July
Uranium and Its Isotope, U 235. 54 July
More About "Wanted—Words." 157 Aug.
Failure of Low-Carbon Steel Still Tubes. 298 Sept.
Continuous Casting—Hazelett's New Mill. 300 Sept.
A Pb-Sn-As Wiping Solder. 301 Sept.
Roosevelt or Willkie? 302 Sept.
More on "Wanted—Words." 302 Sept.
A Pb-Sn-As Solder for Wiping. 648 Nov.

Magnesium.—L. B. Grant. 762 Dec.
——— **in Aircraft.**—Norman E. Woldman. 420. Oct.

Manganese.—M. B. Gentry. 415 Oct.

McCune, Charles A.; Appreciation of. 628 Nov.

Mercury.—C. S. Wehrly. 424 Oct.

Metal Decorations in the "S. S. America." 284 Sept.

Metallurgical Observers in Steel Making.—Edwin F. Cone. 624 Nov.

Metals and Alloys in An Air-Conditioned Automobile.—Herbert Chase. 141 Aug.
——— ——— in the Dairy Industry.—H. A. Trebler. 753 Dec.

Metals in Thin Layers—Their Microhardness.—Chauncey G. Peters & Frederick Knoop. 292 Sept.

Microhardness of—Metals in Thin Layers.—Chancey G. Peters & Frederick Knoop. 292 Sept.

Mounting Lead Foil for Radiographic Screens.—Royal G. Tobey & Herman E. Seeman. 40 July

National Defense. See also Strategic Materials.

National Defense
Some Ferrous Problems in the Defense Program. George B. Waterhouse. 406 Oct.
Non-Ferrous Metals in the Defense Program.—Charles F. Lindsay. 410 Oct.
Beryllium and National Defense.—C. B. Sawyer. 426 Oct.
Magnesium in Aircraft.—Norman E. Woldman. 430 Oct.
Producing Aircraft Stampings in the Douglas Plant.—Herbert Chase. 436 Oct.
Flakes and Cooling Cracks in Forgings—a Problem in Ordnance.—Francis B. Foley. 442 Oct.
Electric Furnaces and National Defense.—W. M. Farnsworth & M. J. R. Morris. 446 Oct.
The Airplane Laboratory and National Defense.—Robert C. Woods. 451 Oct.
Electrical Detection of Flaws in Metal.—Horace C. Knerr. 464 Oct.
U. S. Air Corps Technical Schools. 646 Nov.
Aluminum.—Colin G. Fink. 761 Dec.
Magnesium.—L. B. Grant. 762 Dec.
Technical Committees of the American Iron and Steel Institute.—Charles M. Parker. 764 Dec.

Nickel.—Edwin F. Cone. 418 Oct.

Nitrided Stainless Steels.—Horace Drever. 271 Sept.

Non-Ferrous Metals in the Defense Program.—Charles F. Lindsay. 410 Oct.

Note on a Method of Surface-Working Small Metallic Specimens.—Edwin M. Sherwood. 43 July

Pearlitic Malleable from the Electric Furnace.—Edwin F. Cone. 150 Aug.

Powder Metallurgy
Powder Metallurgy of Copper.—Claus G. Goetzel. 30, 154 July, Aug.
The Iron Powder Situation.—Albert T. Fellows. 288 Sept.
Powder Metallurgy—Recent Advances and Design Trends (Report of M. I. T. conference)—Fred P. Peters. 471 Oct.
The Pressing of Metal Powders.—Richard P. Seelig. 744 Dec.

Powder Metallurgy—Recent Advances and Design Trends (Report of M. I. T. conference)—Fred P. Peters. 471 Oct.

——— ——— of Copper.—Claus G. Goetzel. 30, 154 July, Aug.

The Pressing of Metal Powders.—Richard P. Seelig. 744 Dec.

Producing Aircraft Stampings in the Douglas Plant.—Herbert Chase. 436 Oct.

Properties and Heat Treatment of 9 Per Cent Cr—1.5 Per Cent Mo Cast Steels.—Fred B. Riggan. 615 Nov.

Radiographic Screens, Mounting Lead Foil for.—Royal G. Tobey & Herman E. Seemann. 40 July

Rolling World's Largest Copper Circles. 149 Aug.

Silver and Its Alloys in a Modern Locomotive—F. T. Van Syckel. 620 Nov.

Some Ferrous Problems in the Defense Program.—George B. Waterhouse. 406 Oct.

Some Metallurgical Phases of Flame Hardening.—R. O. Day. 166 Aug.

Stainless Steels, Nitrided.—Horace Drever. 271 Sept.

Steel Making, Metallurgical Observers in.—Edwin F. Cone. 624 Nov.

Strategic Materials. See also National Defense.

Strategic Materials
Bearing Metals from the Point of View of Strategic Materials.—H. W. Gillett, H. W. Russell & R. W. Dayton. 274, 455, 629, 749 Sept., Oct., Nov., Dec.
Manganese.—M. B. Gentry. 415 Oct.
Chromium.—Samuel H. Dolbear. 416 Oct.
Nickel.—Edwin F. Cone. 418 Oct.
Tungsten.—Colin G. Fink. 419 Oct.
Antimony.—G. A. Roush. 420 Oct.
Tin.—C. L. Mantell. 421 Oct.
Mercury.—C. S. Wehrly. 424 Oct.
Tin Plate and Solder.—H. W. Gillett. 641 Nov.

Surface-Working Small Metallic Specimens, Note on a Method of.—Edwin M. Sherwood. 43 July

The Technical Committees of the American Iron and Steel Institute.—Charles M. Parker. 764 Dec.

Tin.—C. L. Mantell. 421 Oct.

——— **Plate and Solder**—From the Strategic Viewpoint.—H. W. Gillett. 641 Nov.

Titanium and Some Properties of Cr-Mo Steel for Airplane Tubing.—George F. Comstock. 21 July

Tungsten.—Colin G. Fink. 419 Oct.

U. S. Air Corps Technical Schools. 646 Nov.
